Special Features :

Water Resistance capacity for
more than 48 hours

Ergonomically designed for easy
handling

About G-PACK

G-Pack (Green Pack)... The Name prescribes the business we are in. In the fast paced world, we believe protecting the nature and living our earth as a better place to live for the forthcoming generations is of greater significance. With this as the DNA of G-Pack and the obsession to improve the human lifestyle by promoting Eco-Friendly Products usage, G-Pack ventured into Recycling Paper and Pulp Molded Products Manufacturing.

Our Manufacturing facility and Process too are Eco-Friendly. Located at Kallapalayam, Coimbatore, India. With over 6000 sq.ft built up area and state of art machineries uses Electric Power - generated from renewable energy sources (Wind Mill), Sunlight/Wood Fuelled Dryer, Minimal Water Consumption, Nil Residual deposits and many more Nature Conserving Processes.

Emphasizing the concept Reuse & Recycle, all our products manufactured are by recycling used paper. Paper Pulp made products are Environment Friendly, Recyclable, Bio-Degradable and Economic.
